

Experiment - 1

Car Booking Reservation System Using Zoho One (SaaS)

Aim

To develop a cloud-based Car Booking Reservation System using Zoho One and demonstrate its working as a Software as a Service (SaaS) application.

Procedure

1. Sign in to the Zoho One cloud platform with the required account.
2. Open Zoho Creator from the applications available in Zoho One.
3. Create a new application for handling car booking reservations.
4. Create a new form and give it the name Car Booking Reservation.
5. Add the required fields: From, To, Rental, Outstation, Package Type, and Hours/Days.
6. Select appropriate field types according to the information that each field should accept.
7. Arrange and format the form to provide a simple and user-friendly interface.
8. Save the form and publish the application.
9. Enter sample cab booking information into the created form.
10. Submit the details and confirm that the information is stored successfully in the cloud.
11. Test the system using different booking details to check its operation.
12. Confirm that the Car Booking Reservation System operates successfully as a SaaS application.
