Room Booking System Using Zoho One (SaaS)

Aim

To design a Room Booking System using Zoho One as a cloud-based Software as a Service (SaaS) solution.

Procedure

1. Sign in to the Zoho One cloud platform with the required credentials.
2. Open Zoho Creator from the available Zoho One applications.
3. Create a new application for handling room reservations.
4. Create a new form and name it Room Booking.
5. Add the required fields such as Room Name, User Name, Booking Date, Start Time, and End Time.
6. Set the suitable data type for each field according to the booking requirements.
7. Arrange the form fields in a clear and user-friendly manner.
8. Save the form and publish the application.
9. Enter sample room reservation details into the form.
10. Submit the booking information and verify that the records are stored in the cloud.
11. Test the application using different rooms, dates, and time periods.
12. Check that the Room Booking System works correctly as a SaaS application.
