

Experiment - 5

Appointment Booking System Using Zoho One (SaaS)

Aim

To develop an Appointment Booking System using Zoho One and demonstrate its functionality as a cloud-based Software as a Service (SaaS) application.

Procedure

1. Log in to the Zoho One cloud platform using the required account.
2. Open Zoho Creator from the Zoho One applications.
3. Create a new application for managing appointments.
4. Create a new form and name it Appointment Booking.
5. Add the required fields such as Customer Name, Contact Number, Appointment Date, Time, and Service.
6. Configure the field types according to the information to be entered.
7. Arrange the form to provide an easy and convenient booking interface.
8. Save and publish the appointment form.
9. Enter sample appointment details into the form.
10. Submit the information and confirm that the appointment record is saved in the cloud.
11. Test the system by entering different appointment dates, times, and services.
12. Verify that the Appointment Booking System operates successfully as a SaaS application.
